Subject Index of Volume 73

Absorption
temperature-dependent absorption cross-sections of CF_3COCl, CF_3COF, CH_3COF, CCl_3CHO and CF_3COOH, 1
Absorption cross-sections
temperature-dependent absorption cross-sections of CF_3COCl, CF_3COF, CH_3COF, CCl_3CHO and CF_3COOH, 1
temperature-dependent absorption cross-sections of N_2O_5, 167
Acetonitrile
laser-flash photolysis studies of benoxaprofen and its analogues
1. Yields of triplet states and singlet oxygen in acetonitrile solutions, 97
laser flash photolysis study of chlorine atom/simple arene π-complexes in carbon tetrachloride and acetonitrile, 187
Adsorbed organic acids
aquatic photolysis: photolytic redox reactions between goethite and adsorbed organic acids in aqueous solutions, 105
Amines
interaction of the excited singlet state of disubstituted anthraquinones with aliphatic and aromatic amines: a fluorescence quenching study, 17
Aquatic photolysis
aquatic photolysis: photolytic redox reactions between goethite and adsorbed organic acids in aqueous solutions, 105
Aqueous methanol
photoproduction of hydrogen and 1,2-propanediol from aqueous methanol and ethanol solution catalysed by ZnS, 217
Arene π-complexes
laser flash photolysis study of chlorine atom/simple arene π-complexes in carbon tetrachloride and acetonitrile, 187
Atmospheric photolysis lifetimes
temperature-dependent absorption cross-sections of CF_3COCl, CF_3COF, CH_3COF, CCl_3CHO and CF_3COOH, 1

Benoxaprofen
laser-flash photolysis studies of benoxaprofen and its analogues
1. Yields of triplet states and singlet oxygen in acetonitrile solutions, 97
Biomimetic
biomimetic approaches to the construction of supramolecular catalysts: titanium dioxide–platinum antenna catalysts to reduce water using visible light, 232
4-Bromophenol
electron paramagnetic spin trapping detection of free radicals generated in direct photolysis of 4-bromophenol in aqueous solution, 23

Carbon tetrachloride
laser flash photolysis study of chlorine atom/simple arene π-complexes in carbon tetrachloride and acetonitrile, 187
Chlorine atom
laser flash photolysis study of chlorine atom/simple arene π-complexes in carbon tetrachloride and acetonitrile, 187
Chlorosubstitution
laser photoisomerization of methyl α-arylcinnamates; effect of chloro substitution, 179
Colloidal CdS
factors affecting the kinetics of methyl orange reduction photosensitized by colloidal CdS, 47
Copper(II) nitrilotriacetate
photochemical behaviour of copper(II) nitrilotriacetate in aqueous solution, 213
Cr(VI)
photoelectrochemical study of the TiO_2–Cr system. Observation of strong(001) rutile photoetching in the presence of Cr(VI), 221

Decahydroacridine-1,8-diones
photochemistry and use of decahydroacridine-1,8-diones as photosensitizers for onium salt decomposition, 139
2,3-Diaryl-1H-isoindolium salts
photochemistry of hemicyanines
Part VII. Photochemistry of 2,3-diaryl-1H-isoindolium salts, 35
Dibenzoylmethane
new cleavage photoinitiators for radical polymerization: synthesis and photochemical study of dibromo derivatives of dibenzoylmethane, 197
Dibromo derivatives
new cleavage photoinitiators for radical polymerization: synthesis and photochemical study of dibromo derivatives of dibenzoylmethane, 197
Diphenylbutadiene–dimethylaniline system
effect of magnetic field on luminescent exterplexes: the diphenylbutadiene–dimethylaniline system, 129
Disubstituted anthraquinones
interaction of the excited singlet state of disubstituted anthraquinones with aliphatic and aromatic amines: a fluorescence quenching study, 17
Dyed film
the suitability of a dyed plastic film for biologically effective UVB radiation measurement, 247

Electron paramagnetic spin trapping
electron paramagnetic spin trapping detection of free radicals generated in direct photolysis of 4-bromophenol in aqueous solution, 23
Ethanol
photoproduction of hydrogen and 1,2-propanediol from aqueous methanol and ethanol solution catalysed by ZnS, 217
Ethyl celullose
graft copolymerization of polystyrene macromonomers onto ethyl cellulose homogeneously using UV irradiation, 53

Excited singlet state
interaction of the excited singlet state of disubstituted anthraquinones with aliphatic and aromatic amines: a fluorescence quenching study, 17
Excited state
excited state acidity of bifunctional compounds
3. 1,3-Naphthalenediol picosecond emission. Kinetic and spectroscopic evidence of both possible monoanionic species, 121

First excited state
on the twisted intramolecular charge transfer emission from the first excited state of *p*-(*N*,*N*-dimethylamino)benzonitrile, 177
Fluorescence emission
fluorescence emission from mechanical pulp sheets, 59
fluorescence emission from mechanical pulp sheets
II. Estimation of quantum yields, 67
Fluorescence quantum yield
comparative determination of photodegradation kinetics of quinolones, 135
Fluorescence quenching
interaction of the excited singlet state of disubstituted anthraquinones with aliphatic and aromatic amines: a fluorescence quenching study, 17
Free radicals
electron paramagnetic spin trapping detection of free radicals generated in direct photolysis of 4-bromophenol in aqueous solution, 23

Goethite
aquatic photolysis: photolytic redox reactions between goethite and adsorbed organic acids in aqueous solutions, 105
Graft copolymerization
graft copolymerization of polystyrene macromonomers onto ethyl cellulose homogeneously using UV irradiation, 53

Hemicyanines
photochemistry of hemicyanines
Part VII. Photochemistry of 2,3-diaryl-1H-isoindolium salts, 35
Heterogeneous photocatalysis
on the usage of turnover numbers and quantum yields in heterogeneous photocatalysis, 11
Hydrogen
photoproduction of hydrogen and 1,2-propanediol from aqueous methanol and ethanol solution catalysed by ZnS, 217

Laser-flash photolysis
laser-flash photolysis studies of benoxaprofen and its analogues
1. Yields of triplet states and singlet oxygen in acetonitrile solutions, 97
laser flash photolysis study of chlorine atom/simple arene π-complexes in carbon tetrachloride and acetonitrile, 187
Luminescent exterplexes
effect of magnetic field on luminescent exterplexes: the diphenylbutadiene–dimethylaniline system, 129

Magnetic field
effect of magnetic field on luminescent exterplexes: the diphenylbutadiene–dimethylaniline system, 129
Mechanical pulps
fluorescence emission from mechanical pulp sheets, 59
Mechanical pulp sheets
fluorescence emission from mechanical pulp sheets
II. Estimation of quantum yields, 67
Methyl-α-arylcinnamates
laser photoisomerization of methyl α-arylcinnamates; effect of chloro substitution, 179
Methyl orange reduction
factors affecting the kinetics of methyl orange reduction photosensitized by colloidal CdS, 47
Monoanionic species
excited state acidity of bifunctional compounds
3. 1,3-Naphthalenediol picosecond emission. Kinetic and spectroscopic evidence of both possible monoanionic species, 121

N_2O_5
temperature-dependent absorption cross-sections of N_2O_5, 167
NADH analogues
the mechanisms of the oxidation of NADH analogues
1. Photochemical oxidation of *N*-unsubstituted 1,4-dihydropyridines by various acceptors, 151
the mechanisms of the oxidation of NADH analogues
2. *N*-methyl-substituted 1,4-dihydropyridines, 159

Onium salt decomposition
photochemistry and use of decahydroacridine-1,8-diones as photosensitizers for onium salt decomposition, 139
Oxidation
the mechanisms of the oxidation of NADH analogues
1. Photochemical oxidation of *N*-unsubstituted 1,4-dihydropyridines by various acceptors, 151
the mechanisms of the oxidation of NADH analogues
2. *N*-methyl-substituted 1,4-dihydropyridines, 159
Oxidation–reduction
oxidation–reduction reaction of photoinduced benzyl radicals in water: *para* substituent effect, 205

Para substituent effect
oxidation–reduction reaction of photoinduced benzyl radicals in water: *para* substituent effect, 205
Photochemical degradation
the photo-Fenton reaction — an effective photochemical wastewater treatment process, 75
Photochemical oxidation
the mechanisms of the oxidation of NADH analogues
1. Photochemical oxidation of *N*-unsubstituted 1,4-dihydropyridines by various acceptors, 151
Photodegradation
comparative determination of photodegradation kinetics of quinolones, 135
Photodegradation quantum yield
comparative determination of photodegradation kinetics of quinolones, 135
Photoetching
photoelectrochemical study of the TiO_2–Cr system. Observation of strong(001) rutile photoetching in the presence of Cr(VI), 221
Photo-Fenton reaction
the photo-Fenton reaction — an effective photochemical wastewater treatment process, 75
Photoinduced benzyl radicals
oxidation–reduction reaction of photoinduced benzyl radicals in water: *para* substituent effect, 205

Photoiniators
the chemistry of photoinitiators – some recent developments, 81
new cleavage photoinitiators for radical polymerization: synthesis and photochemical study of dibromo derivatives of dibenzoylmethane, 197
Photoisomerization
laser photoisomerization of methyl α-arylcinnamates; effect of chloro substitution, 179
Photolysis
electron paramagnetic spin trapping detection of free radicals generated in direct photolysis of 4-bromophenol in aqueous solution, 23
Photolytic redox reactions
aquatic photolysis: photolytic redox reactions between goethite and adsorbed organic acids in aqueous solutions, 105
Photoproduction
photoproduction of hydrogen and 1,2-propanediol from aqueous methanol and ethanol solution catalysed by ZnS, 217
Photosensitization
factors affecting the kinetics of methyl orange reduction photosensitized by colloidal CdS, 47
Photosensitizers
photochemistry and use of decahydroacridine-1,8-diones as photosensitizers for onium salt decomposition, 139
Photostability
comparative determination of photodegradation kinetics of quinolones, 135
Phototransformation
photochemistry of hemicyanines
Part VII. Photochemistry of 2,3-diaryl-1H-isoindolium salts, 35
Picosecond emission
excited state acidity of bifunctional compounds
3. 1,3-Naphthalenediol picosecond emission. Kinetic and spectroscopic evidence of both possible monoanionic species, 121
Pigmented coatings
the chemistry of photoinitiators – some recent developments, 81
p-(*N*,*N*-dimethylamino)benzonitrile
on the twisted intramolecular charge transfer emission from the first excited state of *p*-(*N*,*N*-dimethylamino)benzonitrile, 177
Polystyrene
graft copolymerization of polystyrene macromonomers onto ethyl cellulose homogeneously using UV irradiation, 53
1,2-Propanediol
photoproduction of hydrogen and 1,2-propanediol from aqueous methanol and ethanol solution catalysed by ZnS, 217

Quantum yields
on the usage of turnover numbers and quantum yields in heterogeneous photocatalysis, 11
fluorescence emission from mechanical pulp sheets
II. Estimation of quantum yields, 67
Quinolones
comparative determination of photodegradation kinetics of quinolones, 135

Radical polymerization
new cleavage photoinitiators for radical polymerization: synthesis and photochemical study of dibromo derivatives of dibenzoylmethane, 197

Singlet oxygen
laser-flash photolysis studies of benoxaprofen and its analogues
1. Yields of triplet states and singlet oxygen in acetonitrile solutions, 97
Supramolecular catalysts
biomimetic approaches to the construction of supramolecular catalysts: titanium dioxide–platinum antenna catalysts to reduce water using visible light, 232

TiO_2–Cr system
photoelectrochemical study of the TiO_2–Cr system. Observation of strong(001) rutile photoetching in the presence of Cr(VI), 221
Triplet states
laser-flash photolysis studies of benoxaprofen and its analogues
1. Yields of triplet states and singlet oxygen in acetonitrile solutions, 97
Turnover numbers
on the usage of turnover numbers and quantum yields in heterogeneous photocatalysis, 11
Twisted intramolecular charge transfer
on the twisted intramolecular charge transfer emission from the first excited state of *p*-(*N*,*N*-dimethylamino)benzonitrile, 177

UVB radiation
the suitability of a dyed plastic film for biologically effective UVB radiation measurement, 247
UV irradiation
graft copolymerization of polystyrene macromonomers onto ethyl cellulose homogeneously using UV irradiation, 53

Visible light
biomimetic approaches to the construction of supramolecular catalysts: titanium dioxide–platinum antenna catalysts to reduce water using visible light, 232

Wastewater
the photo-Fenton reaction – an effective photochemical wastewater treatment process, 75
